MOTOR STARTER	460/575 volt, softstart with 110 volt controls, NEMA 4 enclosure, UL, ETL listed and solid state three phase overload relay. Cam-Lok cable connectors.
PROTECTIVE DEVICES	Class 20 solid state overload relay, high air temperature, high pressure shut down switches and anti-restart pressure switch, preventing starting while air compressor is pressurized. Electric phase reversing warning light, cold weather package, and disconnect switch .
AIR INTAKE FILTER	Heavy duty 2-stage.
CONTROLS	Full modulation, solenoid controlled for smooth lowest possible no load power. Automatic start/stop or constant speed.
ACOUSTICAL ENCLOSURE	Easy removable panels for faster maintenance and accessibility.
SKID MOUNTING	Complete fluid containment skid with drains.
LIFTING POINT	Central located lift bail for ease of loading and unloading for 50-250hp, and four point lift for 300-450hp.
INSTRUMENTATION	Line pressure gauge, discharge pressure gauge, hour meter, temperature gauge, lube filter and separator element differential gauge.
COMPRESSOR LUBE FILTER	Spin on type mounted strategically for ease of maintenance.
DISCHARGE AIR QUALITY	2-3 PPM lubricant carryover, separator/trap.

Utility companies, paper mills, shipyards, power plants and many jobsites have electric power available making these heavy duty air compressors an ideal fit.
